

Humanoid Body Hits

Introduction

This video will help you understand how to enable and setup body hit animation for the humanoid AI agent.

Enable Impact Animations

First check the checkbox 'Use Impact Animations' located in the combat state behaviour.
[See the image below]

Enabling this checkbox will enable the 'HumanoidBodyHits' script below.

Humanoid Body Hits (Script)

Script

HumanoidBodyHits

Script Info

This script will play impact animation clips included in animation tree in case Ai will be hit by a bullet. Humanoid Ai agent animator has two layers of hit impacts animations. One for upper body (Torso), in case bullet hits this Ai above the waist line. And another for the lower body (Legs) i.e below waist line
