

Stationed Shoot Posture

Introduction

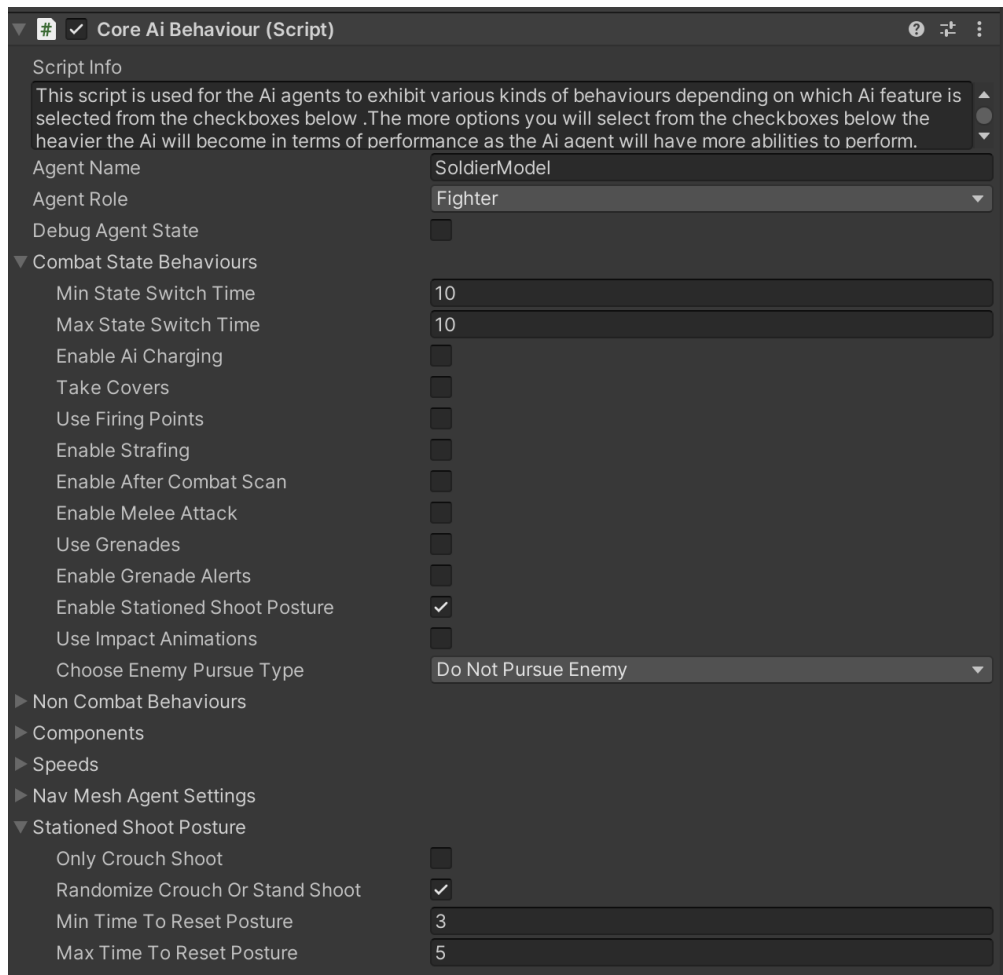

This video will guide you on how to achieve 'Stand' and 'Crouch' shooting on this Humanoid AI agent when the agent is Stationary.

Stationed Shoot Posture

First enable 'Stationed Shoot Posture' located in the combat state behaviour.[See the image below]

Enabling it will show Stationed Shoot Posture options in the script which you can tweak to achieve the desired behaviour.

Fields	Info
Only Crouch Shoot	Enable shooting only in crouched position while stationary and in combat.
Randomize Crouch Or StandShoot	Randomly alternate between sitting and standing while shooting, but only when stationary and in combat.
Min Time To Reset Posture	Minimum time to reset posture after shooting, applicable when stationary and in combat.
Max Time To Reset Posture	Maximum time to reset posture after shooting, applicable when stationary and in combat.
