

Winning Conditions

Introduction

This video will help you understand how to setup winning conditions for the player.

How to setup

Create an empty gameObject and Add a script called 'Winning Conditons'. This will automatically add 2 more additional scripts named as 'Winning Properties' and 'LevelToUnlock'

!!! note When selecting the win condition options **"Reach Location to Complete Level"** or **"Reach Location and Kill All Enemies"**, you must add a **Box Collider** to the designated area and ensure the **"Is Trigger"** checkbox is enabled.

Winning Properties

This script handles the mission success mechanics. It calculates and displays bonuses for headshots and body kills, updates the total cash won, and manages UI activation upon mission completion.

Fields	Info
BodyKillsBonusText	

	UI text element displaying bonus earned from body kills.
HeadshotBonusText	UI text element displaying bonus earned from headshots.
TotalCashEarnedText	UI text element displaying total cash earned.
BonusPerHeadShot	Bonus amount awarded per headshot.
BonusPerBodyKill	Bonus amount awarded per body kill.
GameObjectsToActivateOnMissionSuccess	GameObjects to activate when the mission is successfully completed.
GameObjectsToDeactivateOnMissionSuccess	GameObjects to deactivate when the mission is successfully completed.
ShowTotalBodyKills	Number of body kills in the current mission.
ShowTotalHeadShots	Number of headshots in the current mission.
TotatHeadShotBonusRecieved	Total bonus earned from headshots.
TotalBodyKillsBonusRecieved	Total bonus earned from body kills.
TotalCashEarned	Total cash won in the mission.

Level To Unlock

This script manages level unlocking. When a player completes a level, it updates the highest level reached in PlayerPrefs, allowing progression to the next level.

Fields	Info
NextLevelToUnlock	The next level that should be unlocked upon completion of the current level.

Winning Conditions

This script defines different win conditions for a level, such as reaching a location, killing all enemies, or a combination of both. It checks enemy status and triggers level completion when conditions are met.

Fields	Info
EnemiesTeamID	The team ID of the enemies that must be eliminated to win the level.
WinCondition	Defines the win condition for this level.
TimeToCheckForEnemies	Time interval (in seconds) for checking if all enemies are eliminated.
DisplayEnemies	List of enemy targets currently active in the scene.
